and Alaska Native tribal responses alone and 2.7 percent alone or in any combination (see Figure 6 and Table 5).

There were 45,919 respondents who reported Eskimo alone and an additional 8,842 who reported Eskimo with at least one other race or American Indian or Alaska Native tribal grouping. A total of 54,761 people reported Eskimo alone or in combination with one or more other races or American Indian or Alaska Native tribal groupings.

Tlingit-Haida, Alaska Athabascan, and Aleut were the next three largest specified Alaska Native tribal groupings. There were 14,825 people who reported Tlingit-Haida alone and an additional 7,540 who reported Tlingit-Haida with at least

one other race or American Indian or Alaska Native tribal groupings. A total of 22,365 people reported Tlingit-Haida alone or in combination with one or more other races or American Indian or Alaska Native tribal groupings.

There were 14,520 people who reported only Alaska Athabascan and an additional 4,318 people who reported Alaska Athabascan with one or more other races or American Indian or Alaska Native tribal groupings. A total of 18,838 people reported Alaska Athabascan alone or in combination with at least one or more other races or American Indian or Alaska Native tribal groupings.

Also, there were 11,941 people who reported only Aleut and an addition-

al 5,037 people who reported Aleut with one or more other races or American Indian or Alaska Native tribal groupings. A total of 16,978 people reported Aleut alone or in combination with at least one or more other races or American Indian or Alaska Native tribal groupings.

### What proportion of American Indians and Alaska Natives reported more than one tribal grouping?

The proportion of respondents reporting a tribe with at least one other race or American Indian tribal grouping varied among the ten largest American Indian tribal groupings (see Table 5). Of all the respondents who reported more than one race or American Indian tribal grouping, the Blackfeet tribal grouping had the highest proportion, with 68 percent. The next two tribal groupings with the highest proportion of respondents reporting at least one other race or American Indian tribal grouping were Cherokee (62 percent) and Choctaw (45 percent). Of the ten largest American Indian tribal groupings, the Navajo had the lowest proportion (9.7 percent) reporting more than one race or American Indian tribal grouping, followed by Pueblo (19.6 percent).

Among the largest Alaska Native tribal groupings, the highest proportion of all respondents who reported more than one race or American Indian or Alaska Native tribal groupings was the Tlingit-Haida with 34 percent. The other tribal groupings with respondents reporting at least one other race or American Indian or Alaska Native tribal grouping were Aleut (30 percent) and Alaska Athabascan (23 percent). The Eskimo had the lowest proportion of respondents (16 percent) reporting more than one race or American Indian tribal grouping.
